

The USB-C to Gigabit Ethernet Network Adapter is an ideal solution for converting an existing USB-C port to a RJ45 Gigabit Ethernet port for a wired network connection to the Internet. This adapter utilizes the high bandwidth of the USB-C port to support true Gigabit Ethernet speeds. This flexible solution requires no external power supply, simply connect the adapter to an available USB-C port, and connect a Cat5 cable from the adapter to an RJ45 Network port. With speeds up to 1000Mbps, file transfer between computers is fast and easy, even with large amounts of multimedia data. The adapter is a great solution for those new computers that do not provide a wired Ethernet port or have a damaged Ethernet port.

Learn more about the new [USB 3.1 Specification and new USB Type-C Connector](#).

Features & Benefits

Adds a wired network connection for Internet access

Designed for use with a USB-C port

Auto-sensing detects the correct network speed

Supports PXE Boot

Specifications

General Info

Product Line	C2G	Color	Black
UPC Number	757120293262	Country Of Origin	China
Application Sector	Residential, Commercial	Warranty Type	5-Year
Type	Adapter, Active Device		

Technical Information

Jacket Material	PVC (Polyvinyl Chloride)	Data Transfer Rate	10 Gbps
Adapter Rear	RJ-45 Female	Adapter Front	USB-C Male
