

This PC to TV Video Converter allows you to convert the VGA video signal from your computer to a Composite Video or S-Video signal which allows you to connect your PC, Mac or other VGA device to your TV or projector. This is useful when connecting your computer to an older TV or projector for large screen viewing. The converter kit includes a USB power adapter so it can draw power from your computer instead of requiring a dedicated outlet. This small footprint of this device makes it easy to carry when traveling and allows it to fit into tight spaces. The menu options allow for customization of display adjustment settings ensuring optimal presentation of the computer content.

## Features & Benefits

- Convert a VGA video signal from a computer to a Composite Video or S-Video signal
