

This short range HDMI and USB over cat5 extender is an ideal solution to deliver audio, video and USB signals from a computer or media player to an interactive whiteboard, digital signage, or other interactive displays.

Target customers with an interactive touchscreen display or engage students with an interactive whiteboard. This powerful kit offers USB control of interactive displays while delivering video and audio through HDMI, providing a dynamic experience truly connecting with the audience.

Connecting with an audience is one thing, but delivering the content and control from a distance is more complex. This Kit removes the complexity of transmitting both USB control and A/V content to be displayed on touch screens or interactive whiteboards. This straightforward solution allows the content and control to be delivered up to 75 feet away, which offers installation options far beyond the length limitations of standard USB or HDMI cabling.

The short range HDMI + USB over Cat5 extender functions as a KVM extender or an interface point for remote terminals in a retail store, which provides a single simple solution to control remote devices . With 4 USB ports and HDMI audio/video output this kit allows for USB devices like a printer, mouse, keyboard, flash drive, or web cam next to an HDMI display to be installed in a remote location. This setup provides remote control and access of a computer or other source device installed in a secure location.

Save time and money with an effortless install. Simply run two solid conductor Cat5e or Cat6 cables up to 75 feet between the transmitter at the source and the receiver at the display, connect all applicable devices, and turn the power on. There are no drivers to install. This plug and play solution passes EDID and HDCP, and supports all USB 2.0 functionality ensuring quick install and a setup with no configuration.

Note: Ensure solid reliable connection between the short range HDMI and USB over cat5 extender and critical equipment. Learn more about the new HDMI Cables with gripping connectors.

## Features & Benefits

Extend HDMI audio/video and USB signals up to 75 feet

Backwards compatible with USB 1.1 devices

Supports resolutions up to 1080p

Designed to support USB 2.0 communication and features

Built to support EDID passthrough and HDCP

## Specifications

### General Info

---

Product Line	C2G	Color	Black
UPC Number	757120296379	Country Of Origin	Taiwan, Province Of China
Application Sector	Commercial, Hospitality	Type	Active Device, Extender, Kit

---

#### Technical Information

---

Max Distance Support	75 ft	Video Resolution	1080p
Connector 2	USB-A Female, HDMI Female, USB-A Female, RJ-45 Female, RJ-45 Female, USB-A Female, USB-A Female	Connector 1	RJ-45 Female, USB Mini-B Female, RJ-45 Female, HDMI Female
