

Our 10G-CX4 latching cable incorporates semi-automated manufacturing, innovative cable and connector designs, and unique materials to provide an interconnect ideally suited for 10G-CX4 applications. This cable, which is part of the 10G ethernet standard, provides superior signal fidelity over a long distance. It is engineered to be compliant with the IEEE Draft P802.3ak/D5.3 specification.

## Features & Benefits

- Provides a secure connection to hardware
- Available in lengths up to 10m
- Designed for high performance 10G-CX4 applications

## Specifications

### General Info

Product Line	C2G	Type	Cable
--------------	-----	------	-------

### Dimensions

Cable Length	3.3 ft
--------------	--------

### Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
--------------------------	-----	--------------------------	------------------------------

### Technical Information

Cable Type	Active Copper Cable	Adapter Rear	CX4 Male
Adapter Front	CX4 Male
