

Cost-effective solution that provides higher bandwidth and transmission rates and supports longer distances with lower loss than 62.5/125 fiber. Specifically designed for use with today's narrower aperture components, this cable is fully compatible with multimode applications. The plenum rating provides the fire protection required to run this cable within walls and air plenums without using conduit. The patented injection molding process provides each connection greater durability in resisting pulls, strains and impacts from cabling installs.

Each cable is 100% optically inspected and tested for insertion loss before you receive it. A pull-proof jacket design surrounds the popular 50/125 multimode fiber, immune to electrical interference.

Features & Benefits

Designed to support gigabit ethernet, fibre channel, Infiniband, ATM, and internet protocol applications	Plenum CMP rated for cable runs through walls and drop ceilings with plenum air space
Patented injection molding process for greater durability	Optically inspected and tested for insertion loss
Pull-proof jacket design, immune to electrical interference
