

This wall mount speaker is the perfect solution for K-12 classrooms, conference rooms or other learning, sharing and collaborating environments that require a sound reinforcement system for multimedia presentations, video clips, and movies. The wall mount configuration allows this speaker to be securely mounted to a wall or other flat surface. This speaker is built to a 70V industry standard and integrates seamlessly with distributed speaker systems, such as a public address (PA) system.

Wall mount speakers work best in rooms with sharp angles, room partitions (alcoves) or in rooms where ceiling mounting is not a practical option. These speakers disperse sound at 120 degrees for full classroom coverage. Designed for long life, rubber surrounds and poly cone construction provide a durable solution that will not degrade over time compared with paper/foam constructed speaker components.

**Note:** This speaker is sold individually and not in pairs.

## Features & Benefits

Built to a 70V industry standard	Integrates seamlessly with distributed speaker systems
Disperses sound at 120 degrees for full classroom coverage	Rubber surrounds and poly cone construction for durability
Perfect solution for K-12 classrooms, conference rooms, and other learning environments	Provides sound reinforcement for multimedia presentations, video clips, and movies
Ideal for rooms with sharp angles, room partitions, or where ceiling mounting is not practical	Long-lasting and durable construction that will not degrade over time

## Specifications

### General Info

Product Line	C2G	Color	Black
UPC Number	757120399087	Country Of Origin	China
Type	Speaker		

### Dimensions

Product Length US	5.0 in
