

The 6ft USB Mac® File Transfer and Sync Cable is ideal for transferring files from an old computer to a new computer, syncing folders on a backup computer or sharing resources between two computers. The Go! Suite software is embedded on the cable and will install automatically making this cable simple to use.

Easily transfer folders, files, e-mails, music, photos, videos, and document files between two computers using the Go! Bridge Utility. This is the perfect solution for users who have purchased a new computer and have a need to recover files and folders from an old computer. Users who are transferring from an old to a new computer will also benefit from the Outlook Sync utility which allows email contacts to be transferred between computers.

The Folder Sync Utility functions as a backup utility by creating a copy of the user's primary computer folders on the user's secondary computer. This provides an easy to use solution for those users looking to protect important data from being lost. The Remote Share Utility allows users to share resources between two computers, such as an Internet connection or a CD Drive. This is an ideal solution for quickly and easily adding functionality to a computer without opening the computer case.

The 6ft USB Mac File Transfer and Sync Cable is a versatile solution that allows users to maximize utility, save time and save money. This cable allows for transfers between an old and new computer, a primary and secondary computer, or even a Mac® and Windows® computer.

## Features & Benefits

Supports file transfers, folder syncing, Microsoft® Outlook® syncing and resource sharing

Transfer software is embedded on the cable

USB 2.0 bandwidth

Compatible with Mac® and Windows® computers

## Specifications
