

Connect digital camcorders, satellite receivers, DVD players, PC with TV out or any video source with s-video output jacks to a TV, monitor or a/v receiver with s-video input jacks. Our s-video cable also provides the right solution for connecting extended definition video recorders or digital satellite systems to your a/v receiver or television/monitor. Carefully designed precision video conductors ensure optimal video quality.

Individually shielded Y (luminance) and C (chrominance) conductors are combined with an overall aluminum foil and OFC braid shield to protect against radio frequency interference (RFI) and electromagnetic interference (EMI). This cost-effective high-performance cable ensures maximum video quality when compared with s-video cables typically included with consumer electronics products.

Oxygen-free copper wire and the 24K gold-plated OFC connectors deliver all the detail, color and brightness you expect from your s-video component. Fully molded connectors provide excellent strain relief while the stylish, ultra-flexible PVC jacket enhances cable durability for years of audio/video enjoyment.

Please Note: In addition to fitting standard 4-pin s-video jacks, the Velocity s-video cable fits most 7-pin jacks found on desktop and laptop PCs with a TV out jack.

## Features & Benefits

Individually shielded conductors

Fully molded connectors

Flexible PVC jacket

24K gold plated connectors

## Specifications

### General Info

Product Line	C2G	UPC Number	757120400011
Country Of Origin	China	Application Sector	Residential, Commercial
Warranty Type	Lifetime	Type	Cable

### Dimensions

Cable Length	1.5 ft
--------------	--------

### Additional Information

---

Prop 65 Warning Required

Yes

Prop 65 Warning Language

Cancer and Reproductive  
Harm

---

## Technical Information

---

Jacket Material

PVC (Polyvinyl Chloride)

Cable Type

Video

---

Jacket Rating

Standard Non-Rated

Adapter Rear

S-Video Male

---

Adapter Front
