

The TOSLINK to RCA Digital Audio Bi-Directional Converter is the ideal solution for connecting devices with different digital audio ports. This converter ensures system compatibility by accepting a TOSLINK or RCA Digital Audio input and delivering a dual-output in both formats.

From a TOSLINK input, the unit will convert to RCA Digital Audio, but may also be used to extend a TOSLINK signal up to an additional five meters. From a RCA Digital Audio input, the unit will provide both RCA Digital Audio and TOSLINK outputs. This is the ideal solution for converting the digital audio output from a Blu-ray player, DVD player, cable box, or satellite receiver to the input required by an A/V receiver or sound system.

Note: The AC/DC adapter is included; however, for your convenience, it is available as a replacement item. Contact us at 1-800-506-9607 and order part number 98027 for a replacement AC/DC adapter.
