

C2G
Discontinued - 35ft (10.7m) S-Video Cable with Low Profile Connectors M/M - Plenum CMP-Rated
Part No. CG-40562

Audio/video installations in educational and commercial settings often require plenum-rated cabling. Our plenum-rated line was engineered to overcome common challenges faced by installers. Low-profile connectors (1.5in total depth) save valuable space in electrical boxes, and enable easier in-wall connections. And our small-diameter (.025in) cable design further reduces the space and clearance required to run the necessary cabling through walls and plenum air spaces.

This cable has a 26 AWG center conductor to ensure signal integrity in your installation, and features a tinned copper braid that provides 95% shielding. The cable is shielded with an aluminum polyester tape to provide 100% coverage. CMP rating provides the fire protection required to run within walls and air plenums without the need for conduit.
