

This stylish decorative wall plate HDMI auto switch is perfect for situations where two HDMI devices must share a single HDMI input on a Projector HDTV or another display device. This HDMI auto switch provides for hassle free operation, easy installation in a wall box, and can match any decor with various color options for the cover plate. The power required for operation of this switch is provided from the HDMI source devices, so no separate power adapter is required\*. This HDMI selector switch provides additional high-definition digital inputs for sources including gaming systems, Blu-ray™, and DVD players.

The auto switching functionality provides for a system that is easy to use, while manual switching functionality is available for situations where more control is desired. The auto switching feature is able to sense when a new device is connected or powered on and will automatically switch to that port. When the device is disconnected or powered off, then this feature automatically switches to the first connected device. In situations where two devices are connected to the switch and powered on, or sending an HDMI signal to the switch, the Select button on the top of the switch may be used to switch back and forth between the two inputs.

**Please Note:** Most HDMI source devices are able to provide the necessary power for the operation of the HDMI switch; however, in some situations the power supply of the HDMI source device is insufficient and additional power is required. In those situations, power for the HDMI switch may be provided using the supplied HDMI voltage inserter.

## Features & Benefits

Autosensing function allows automatic device selection when a new source is plugged in such as a tablet or notebook. Manual switching provides the user with the control to switch between sources such as a Bluray player or computer.

Multiple face plate color options to match the decor of a room. 2.5Gbps bandwidth

Supports Deep Color
