

Add the finishing touch to audio/video installations with a feed-through wall plate. This wall plate is designed to mount in standard electrical boxes or mud rings. The thick aluminum composition provides better protection than plastic wall plates in commercial environments where constant wear and tear causes damage.

Feed-through connectors and identification markings make this wall plate simple to install and easy to connect equipment. Furthermore, it is compatible with any existing wiring network. The single gang design offers connectors for HD15, 3.5mm stereo audio, composite video, and left/right audio, all in one wall plate. In addition, the cut-out provides a space for additional components like our USB Superboosters that fit a standard opening. Feed-through connectors are designed to offer lossless signal transfer and maximum insertions for a lifetime of service.

## Features & Benefits

Available in different colors	Feed-through connectors and identification markings
Compatible with any existing wiring network	Connectors are designed to offer lossless signal transfer and maximum insertions

## Specifications

### General Info

Product Line	C2G	Color	White
Application Sector	Commercial, Residential	Type	Wall Plate

### Technical Information

Connector 2	RCA Stereo Audio Female, 3.5mm Stereo Female, RCA Composite Video Female, VGA Female	Connector 1	RCA Stereo Audio Female, 3.5mm Stereo Female, RCA Composite Video Female, VGA Female
