

Quickly becoming the standard in satellite and cable television installation, our compression connectors provide reliable connections with a high resistance to moisture. High frequency, these are compatible with digital cable and satellite. The bright nickel finish withstands harsh environments, and reduces the effects of oxidation.

An o-ring in the nut and a tapered plastic ferrule provide a barrier to moisture migration through the threads and under the cable jacket that would otherwise damage the cable. Use item #38011, our 3-in-1 compression tool, for easy installation.

Features & Benefits

| | |
|--|---|
| Reliable connections with high resistance to moisture | Compatible with digital cable and satellite |
| Ensures reliable and secure connections for satellite and cable television | Durable bright nickel finish withstands harsh environments, ensuring long-lasting performance |
| Reduces the effects of oxidation, maintaining signal quality | O-ring and tapered plastic ferrule prevent moisture migration, prolonging the lifespan of the cable |
| Easy installation with the use of the 3-in-1 compression tool, saving time and effort. | |

Specifications

General Info

| | | | |
|--------------------|-------------------------|-------------------------|---------------------------|
| Product Line | C2G | Replaced by Part Number | 41074 |
| UPC Number | 757120410768 | Country Of Origin | Taiwan, Province Of China |
| Application Sector | Commercial, Residential | Warranty Type | Lifetime |
| Type | Connector | | |

Dimensions

| | |
