

This type of connector is commonly used for antenna, cable television and satellite television installations. Made from anodized brass to provide long life, free from oxidation. The nut on this connector is larger than that on most f-type connectors available, and that means more threads for better shielding, and a larger surface to finger-tighten the connector. Use item #38026, our RG6 quad shield crimping tool, for easy installation.

Specifications

General Info

Product Line	C2G	UPC Number	757120410829
Country Of Origin	Taiwan, Province Of China	Type	Connector

Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
