

C2G

Discontinued - RapidRun® Double Gang Integrated VGA (HD15) + 3.5mm + Cut-Out Wall Plate - Brushed Aluminum

Part No. CG-42354

RapidRun® is designed to be the standard for in-wall audio/video installations. The RapidRun system empowers you to customize your installation to create your own ideal audio/video solution. Break-away flying leads and wall plates ensure flexible, efficient, high quality connections for all types of equipment.

Ideal for educational and institutional installations, this wall plate receives PC video, 3.5mm stereo audio from one cable. It is commonly used at the teacher's station with the display (projector) end of classroom setups with the corresponding flying lead (#40853, #42106, #42107 or #42108) used. In addition, the cut-out provides a space for additional components that fit a Decora style opening. Constructed from aluminum for durability, this wall plate has a locking connector that enables the integrator to save valuable space inside the surface mount or electrical box that typically is already packed with cables.

Please Note: Each complete RapidRun solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. For each runner you will need (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Decora® is a registered trademark of Leviton Manufacturing Company, Inc. This product is not manufactured or endorsed by the Leviton Manufacturing Company, Inc
