

The Wireless Conference Table Box for HDMI provides a simple way to wirelessly connect an HDMI device to a display, while also managing and delivering power. The table box has an attractive finish that can match any conference room décor.

**Effortless huddle space connectivity**

Just bring your own device to the huddle space and plug in. This simple, one connection solution allows for quick transition from one user to another – encouraging productivity, inspiration, and teamwork while presenting ideas. Any room can be retrofitted to be a huddle space, as the secure wireless transmission of the A/V signal does not require new cables or existing cable infrastructure.

**De-cluttered conference room**

Set up a conference room without limitations using this wireless system. The display is not limited to the location of the existing wire runs. Place the display anywhere within 100 feet of the transmitter to achieve the optimal setup for any conference room.

**Note:**

The transmitter and receiver do not require line-of-sight to function. However, to achieve the 100ft maximum range, reduce or eliminate the number of obstacles between the transmitter and receiver.

## Features & Benefits

Wirelessly transmit HDMI signal up to 100ft	Supports up to 1080p resolution
Plug and Play, no driver required	The activation surface of the InteGreat A/V Table Box can be adjusted down, in 1/2in (12.7mm) increments, from 1in to 4in (25mm to 102mm)
