

Quickly connect two PC serial ports with the patented Serial270 DB9 cable. This null modem serial cable allows two DTE or DCE devices to communicate with no conflict in data transmission. The 270° DB9 connectors on each end rotate side-to-side in almost a complete circle, allowing you to position the cable to fit your installation. The connectors feature detents, or click-stops, every 90° to ensure signal integrity is maintained.

The oversized thumbscrews are slotted for easy connection to your equipment.

Fully shielded to prevent unwanted EMI/RFI interference; **the transmit and receive signals are crossed to ensure proper data transmission.** With Serial270, the days of not having the right connector orientation on your cables are over!

Please Note: Forcing the connector past the click-stops will break the connector and possibly damage the cable.

Features & Benefits

270° rotating connector

Null modem wiring scheme

Shielded to protect from interference

Specifications

General Info

Product Line	C2G	UPC Number	757120520801
Country Of Origin	China	Features	RS232
Type	Cable		

Dimensions

Cable Length	1 ft
