

RapidRun® is designed to be the standard for in-wall audio/video installations. Using pre-terminated Break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations.

Ideal for educational and institutional installations, this wall plate receives dual PC video, dual 3.5mm stereo audio and RCA composite audio/video from one Runner cable. Constructed from aluminum for durability, this wall plate has a locking connector that enables the integrator to save valuable space inside the surface mount or electrical box that typically is already packed with cables. The included keystone bezels will work with most brands of keystone inserts including Leviton®, L-com®, NetKey®, ADC Krone, HellermannTyton, and Allen Tel.
