

RapidRun is designed to be the standard for in-wall audio/video installations. Using pre-terminated Break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations.

Ideal for educational and institutional installations, this wall plate allows VGA video, 3.5mm stereo audio to be run over one runner cable, while the HDMI and USB pass through ports allow for a seamless transition to an in-wall cabling. This wall plate is constructed from aluminum for durability and a long life.

Please note: Each complete RapidRun Multi-Format solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate. Due to constraints of available conductors for signal transmission, EDID signals are not supported with this product.

Features & Benefits

Designed for use with RapidRun Multi-Format runner cables

Compatible with RapidRun Multi-Format VGA wall plates and flying leads

Specifications

General Info

Product Line	C2G	Color	Ivory
Application Sector	Commercial, Residential	Warranty Type	Lifetime
Type	Wall Plate Insert		

Technical Information

Video Resolution	UXGA (1600x1200)	Number of Gangs	1
Adapter Rear	RapidRun 15-pin Male	Adapter Front	VGA Female
