

C2G
Discontinued - 1.5ft (0.46m) RapidRun® DB9 RS232 Serial Flying Lead
Part No. CG-60109

RapidRun is designed to be the standard for in-wall audio/video installations. Using pre-terminated Break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations.

Ideal for educational and institutional installations, this flying lead sends RS232 Serial over a single Multi-Format runner cable. It is commonly used on the display (projector) end of classroom setups with the corresponding wall plate used at the teacher's station.

Please note: Each complete RapidRun Multi-Format solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Specifications
