

RapidRun is designed to be the standard for in-wall audio/video installations. Using pre-terminated Break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations.

RapidRun Multi-Format represents the most significant upgrade to the RapidRun cabling solution to date. With enhanced engineering that includes individually shielded pairs and an isolated ground for audio lines, this solution meets the rigorous demand for applications in which multiple audio/video devices are run over a single cable.

Ideal for educational and institutional installations, this flying lead sends PC video and RCA stereo audio over one cable. It is commonly used on the display (projector) end of classroom setups with the corresponding wall plate used at the teacher's station.

Please note: Each complete RapidRun Multi-Format solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Specifications

General Info

| | | | |
|-------------------|-------|--------------------|--------------|
| Product Line | C2G | UPC Number | 757120601111 |
| Country Of Origin | China | Application Sector | Commercial |
| Type | Cable | | |

Dimensions

| | |
|--------------|--------|
| Cable Length | 1.5 ft |
|--------------|--------|

Additional Information

| | | | |
|--------------------------|-----|--------------------------|------------------------------|
| Prop 65 Warning Required | Yes | Prop 65 Warning Language | Cancer and Reproductive Harm |
