

RapidRun is designed to be the standard for in-wall audio/video installations. Using pre-terminated Break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations.

Constructed from aluminum for durability, this wall plate has a locking connector that enables the integrator to save valuable space inside the surface mount or electrical box that typically is already packed with cables.

Ideal for educational and institutional installations, this wall plate sends VGA, and Stereo Audio over a single Multi-Format runner cable. It is commonly used on the teacher's station (computer) end of classroom setups with the corresponding flying lead used at the projector. The keystones may be used to integrate RapidRun with existing cable infrastructure, such as Ethernet or Telephone. The included keystone bezels will work with most brands of keystone inserts including Leviton®, L-com®, NetKey®, ADC Krone, HellermannTyton, and Allen Tel.

Please note: Each complete RapidRun solution requires a break-away flying lead or wall plate to terminate each end of the runner cable. Each runner requires (2) break-away flying leads, (2) wall plates, OR (1) break-away flying lead and (1) wall plate.

Specifications

General Info

Product Line	C2G	Color	Aluminum
UPC Number	757120601142	Country Of Origin	China
Application Sector	Residential, Commercial	Warranty Type	Lifetime
Type	Wall Plate, Keystone		

Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
--------------------------	-----	--------------------------	------------------------------

Technical Information

Wire Gauge	24 AWG	Video Resolution	UXGA (1600x1200)
Number of Gangs	2	Data Transfer Rate	10.2 Gbps
Adapter Rear	RapidRun 15-pin Male	Adapter Front	VGA Female, 3.5mm Stereo Female
