

This well featured single gang wall plate will create one location to connect all devices being used by a presenter or teacher. The wall plate provides a single point to connect a laptop, tablet, Blu-ray, or other source device to an interactive whiteboard, projector, or other display. Rapid Run is designed to be the standard for in-wall HDMI or VGA audio/video installations. Using pre-terminated break-away flying leads and wall plates with an in-wall runner ensures flexible, efficient, high quality connections for all types of equipment, with no field terminations. The RapidRun Optical runner is ideal for high resolution displays capable of up to 4k resolution. The Multi-Format runner allows a single cable to pass VGA and 3.5mm Stereo for a clean termination. The USB pass through connects the controlling computer to the interactive whiteboard or other peripheral devices.

Please note:

Features & Benefits

- Supports full 1080p, 4k, and 3D HDMI features
- Utilizes fiber cabling, so it is resistant to EMI/RFI interference
- Powered with USB at the display side (RX)
- Supports VGA video and Stereo Audio signals over a RapidRun Multi-format runner
- Flexible USB pigtail for easy installation in a wall box
- Aluminum construction for durability and long life

Specifications
