C2G Performance Series High Speed HDMI® Active Optical Cables (AOC) are the perfect solution for extending HDMI signals in classrooms, meeting spaces, and other commercial applications requiring high speed HDMI features and video resolutions up to 4K (4096 x 2160) at 60Hz. The cable’s fiber strand construction reduces the risk of EMI/RFI, making performance stable when used in high interference environments such as data centers, surgical theaters, or manufacturing facilities where high resolution and consistent displays are critical.

We have engineered our HDMI AOCs with quality components to give a robust design and enhanced performance, ideal for installation needs that are beyond the length limitations of standard HDMI copper cabling. Adding a thicker wire gauge and Kevlar®, we improved the cable’s pull strength and overall structural integrity. The shielding in these cables optimizes the EMC, preventing unwanted electromagnetic interference and electrostatic discharges, contributing to the long-term reliability of the connected system. The cable jacket meets the fire code requirements for installation within plenum spaces, like a dropped ceiling. The AOC draws power from the HDMI source device. If additional power is needed, an integrated USB-C power pigtail is included on the display end to offer an external power option to maximize compatibility. The use of HDMI 2.1 grade components in the cable confidently improves the operation of HDMI 2.0 applications – enhancing video experiences with higher resolutions, increased speeds, and sharper images at distances far beyond traditional HDMI cabling.

Extensive compatibility and verification tests have been done with various source devices and displays to validate that these HDMI AOCs will withstand real-world applications and scenarios. HDMI AOCs can only run in one direction. The connectors have molded labeling for source and display, so there is no confusion with this directional cable. The source connector end even has a tag on the cable as an extra reminder.

With these being a part of the C2G Performance Series, they include:

- Commercial grade connectors that feature compact overmolding for high-density environments
- Integrated finger grips on the top, bottom, and sides for easy insertion and removal
- Gripping connector shell has 2x greater port retention to keep your devices connected
- Gold plated connectors on the cable allow for better shielding, increased electrical conductivity, and durability

**Note:** Use a USB-C to USB-A cable for additional power. Connect the USB-C to USB-A cable to the integrated USB-C power pigtail on the display end of the cable and power source. We recommend using C2G parts 28871 and 22335.

Additional Technical Specifications

**Electrical Specifications**

- Supply Voltage: 5V
- Signal Bandwidth: 18Gbps @4K 60Hz, 4:4:4

**HDMI Connector:**

- Voltage Rating: 40V AC
- Withstanding Voltage: 300 V DC/0.01s
- Current: 0.5A Min.
- Insulation Resistance: 10Megaohms Min
- Contact Resistance: 30 Milliohms Max

**USB-C Pigtail Connector:**

- Voltage Rating: 20V Max
- Withstanding Voltage: 100V AC
- Current: 5A Min for VBUS
- Insulation Resistance: 100 Megohms Min
- Contact Resistance: 40 Milliohms Max

**Physical Characteristics**

- Cable Bend Radius:
  - [C2G41480-5 ONLY]: Min Bend Radius (No Load): 15mm, Min Bend Radius (Under Load): 70mm
  - [C2G41486-91 ONLY]: Min Bend Radius (No Load): 20mm, Min Bend Radius (Under Load): 75mm
- Connector 1: HDMI Male/Main Cable, Shell: Gold Flash Plating Over All, Housing: Thermoplastic, Blue
- Cable Tensile Strength: Short Term Load: 500N for 10 minutes; Long Term Load: 250N for 30 Minutes
- HDMI Insertion Force: 10kgf Max; Withdraw Force: 4kgf Min.
- Connector 2: USB-C Female/Power Pigtail Adapter, Contact: Gold Plated, Nickel Plating Over All, Housing: LCP, Black
  - Outer Diameter: 2.4mm±0.15mm
  - Pigtail Tensile Strength: 6kgf; Pull force between the HDMI Overmold & Pigtail: 5kgf, Pull Force Between HDMI Overmold and USB Overmold: 5kgf
Features & Benefits

Supports all HDMI 2.0 features including resolutions up to 4K (4096 x 2160) at 60hz, which means higher quality video for viewing your screen content.

Integrated finger grips on the connectors for easy insertion and removal.

Gold plated connectors for increased electrical conductivity and enhanced durability.

Plenum CMP rated jacket, so you can safely run the cable inside plenum spaces, meeting the requirements for an installation in a commercial space.

Gripping connector shell for 2x greater port retention.

Uni-directional cable with source connector labeled and tagged to easily differentiate from the labeled display connector.
