

C2G
Dual LED Work Light
Part No. CG-CL002

The Dual LED Work Light can be positioned in racks or cabinets to illuminate the work area, providing better visibility when installing or servicing equipment or terminating cabling. Designed with flexible mounting and positioning capabilities, this lighting solution provides focused illumination wherever it is needed in the rack or cabinet. The interconnect cable links the two lights enabling simple installation by requiring a single power supply and simple operation with a single switch to turn both lights on or off. The light is UL and cUL compliant and includes a power supply, international power supply adapters, mounting hardware, and an interconnect cable to connect the two lights.

Features & Benefits

Both horizontal (19" EIA) or vertical mounting
Hook & loop installation
Single touch switch for power

Non-restricting low profile design for access or serviceability
Fifty degree pivot in either direction to direct the light to the work area

Specifications
