

C2G

**DISCONTINUED: Rack PDU, Network Switched, Zero U, 24A, 208V, (21) C13 & (3) C19, L6-30P Cord**  
Part No. CG-LP-62300

Distribute, manage, and control power to connected equipment, enabling load monitoring, individual outlet power cycling, and power sequencing. This control can be accessed locally or remotely, multiplying the reach and ability of IT staff and caretakers. A single portal view provides visibility and control of power usage and available capacity, which simplifies the maintenance responsibilities of taxed IT departments.

## Features & Benefits

- Input Plug: NEMA L6-30P
- Networked Controller: Enables remote and local monitoring and control of the PDU and peripherals
- Delayed Power Sequencing: Sequence the order in which each outlet is turned on or off to avoid dropped power loads or circuit overloading
- Output Receptacles: (21) Locking IEC-C13, 12A- (3) Locking IEC-C19, 16A
- Circuit Breaker Trip Detection / Alerting: Get notification instantly in the instance of a tripped circuit breaker
- Outlet Use Management: From the PDU GUI, you can remotely identify named outlets and if an outlet is on or off

## Specifications

### General Info

Product Line	C2G	UPC Number	662875015680
Country Of Origin	Taiwan, Province Of China	Number of Receptacles	24
Application Sector	Commercial, Industrial	Type	PDU

### Additional Information

Prop 65 Warning Required	Yes	Prop 65 Warning Language	Cancer and Reproductive Harm
--------------------------	-----	--------------------------	------------------------------

### Technical Information

Rack Units	0U	Voltage	200 V, 240 V
------------	----	---------	--------------
