

The Legrand VWM Series wall mount cabinets provide a ultra low profile and easy to use solution, perfect for secure networks, small data closets, retail, educational, edge computing, and all areas where floor space is limited.

[B]Convenience[/B]

The split door design allows for user access at the top, while protecting critical equipment behind the front door. Mounting small routers, hubs, and computers that are non-rack mountable is also simplified with the optional patented Lever Lock equipment panels. When customized with many of the optional accessories, the vertical wall-mount cabinets can accommodate many complete computing combinations.

[B]Durability[/B]

The VWM cabinets are made of rugged welded steel and have a UL 2416 certified load rating of 150 lbs. The small form factor cabinets are PCI compliant, have a 31" equipment mounting depth and feature a solid locking door that provides security for the installed equipment.

Features & Benefits

- Certified load rating of 150 lbs per UL2416
- Full swing handle
- Full door design
- Versatile rail mounting locations
- PCI Compliant
- Reversible hinged front locking door
- Patented Lever Lock System
- Cable and fan knockouts
